

Amicor™

Provides a healthy sanctuary from allergens night after night

Amicor™ beds and bedding provide the ultimate sanctuary if you are sensitive to allergens, creating a safe haven for your comfort, softness and a healthy night's sleep.

Amicor™ is a fibre blended inside the fillings of luxurious pillows, quilts and mattress covers produced by The Fine Bedding Company. It is blended into the ticking and top fibre layers of beautiful beds and mattresses made exclusively by Relyon.

" We are happy to recommend Amicor bedding as a way of reducing allergens. "

Conclusions after a Clinical Trial by leading Allerologists at the Red Cross Hospital, Barcelona.

Amicor is endorsed by Allergy UK with their British Allergy Foundation Seal of Approval.

Amicor Pure works from the inside out! It provides protection from deep inside each product. It works by preventing the food source of the dust mite, so colonies of mites simply cannot live inside your beds and bedding, they have to go and find food elsewhere. Amicor Pure's effect lasts, ensuring that beds and bedding remain a healthy and safe haven for you and your loved ones to sleep in. What could be simpler for your long term health?

Amicor Pure is gentle, safe and soft and suitable for babies, children and adults of all ages.
